CERTIFICATE OF COMPLETION AND FINAL ACCEPTANCE

Modernizing the USC Clinic's Patient Information System: A Design and Implementation Project

TO WHOM IT MAY CONCERN:

This is to certify that the proponents mentioned above have successfully completed the design, development, and implementation of the **USC Clinic Patient Information System (PIS)** as part of their undergraduate thesis requirements for the **Department of Computer Engineering**.

The system has undergone a comprehensive **Needs Assessment** and **User Acceptance Testing (UAT)** within the **USC Clinic** to ensure alignment with clinical workflows and operational requirements.

I. Project Endorsement and Functional Validation

The **USC Health Services Office** hereby confirms and endorses the delivery of the following core functionalities as specified in the project scope:

- **Comprehensive Health and Dental Records:** Centralized and secure storage for student medical histories, treatment plans, and dental records.
- **Medical Certificate Optimization:** A streamlined issuance process utilizing predefined templates to ensure accuracy and efficiency.
- **Automated Notification System:** Email and in-app alerts for health campaigns, clinic updates, etc.
- **Health Information Dissemination:** Dedicated modules for targeted health awareness campaigns and educational materials.
- **Patient Feedback and Analysis:** Digital evaluation forms and reporting tools for systematic analysis of patient satisfaction and service quality.
- **Data-Driven Reporting:** A module for generating customizable reports on patient visits and treatment outcomes in PDF and Excel formats.

II. Security and Compliance Authorization

The system is authorized for clinical use based on the implementation of the following security measures:

- **Data Encryption:** Sensitive patient data (names, medical records, treatment plans) is protected using **PostgreSQL pgcrypto** column-level encryption.
- **Role-Based Access Control (RBAC):** Access is strictly limited to authorized medical personnel (Nurses, Doctors, Dentists, and Clinic Staff) according to their exclusive permissions.

III. Final Acceptance

By signing this document, the **USC School Clinic** acknowledges that the system meets the established goals of modernizing healthcare delivery and improving operational efficiency. We confirm that the deliverables are complete, functional, and accepted for deployment within the **University of San Carlos**.

Signed this 15th day of April, 2026 at the University of San Carlos, Cebu City, Philippines.
