Section 1: Baseline Screening

 [Copy chart](#)

Have you previously visited the USC Clinic and experienced their traditional, paper-based (manual) system before utilizing this new digital platform?

30 responses

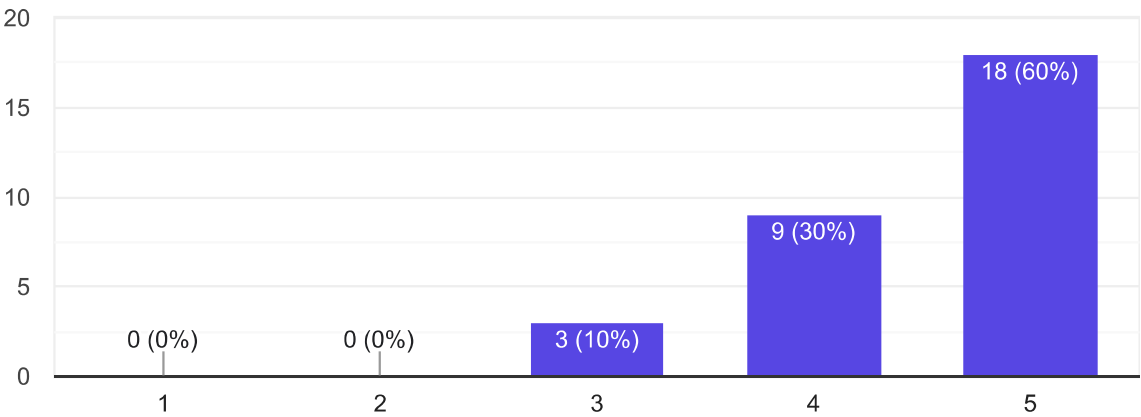

Section 2: General System Usability

It was easy for me to log in and access my records.

 [Copy chart](#)

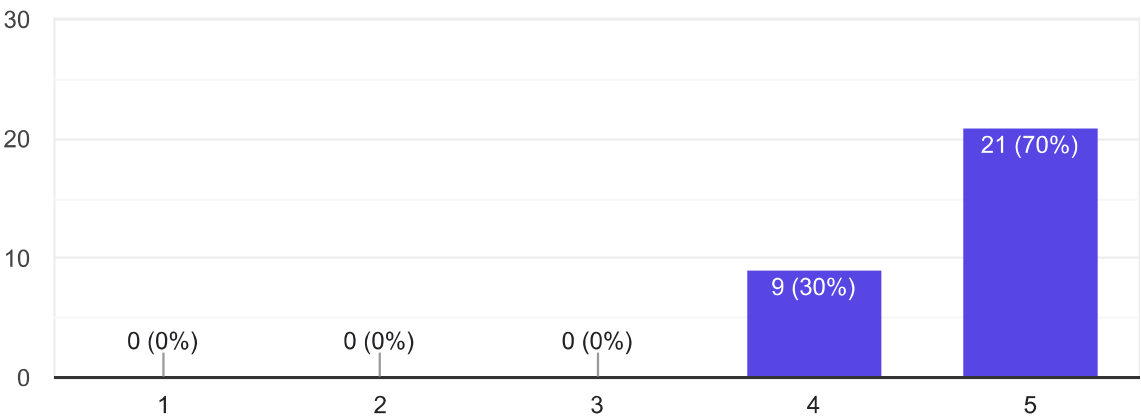

30 responses

The health information displayed was clear and easy to understand.

 [Copy chart](#)

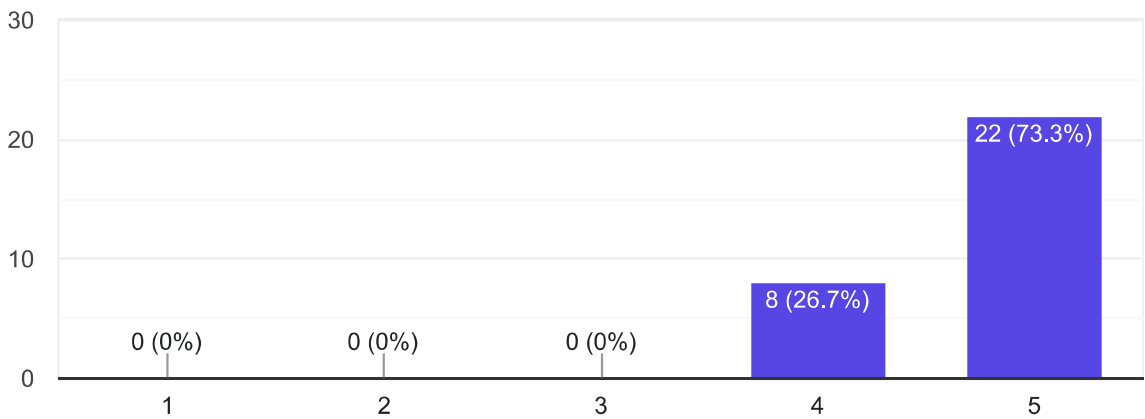

30 responses

The system was responsive and worked smoothly (loading speed, navigation).

 Copy chart

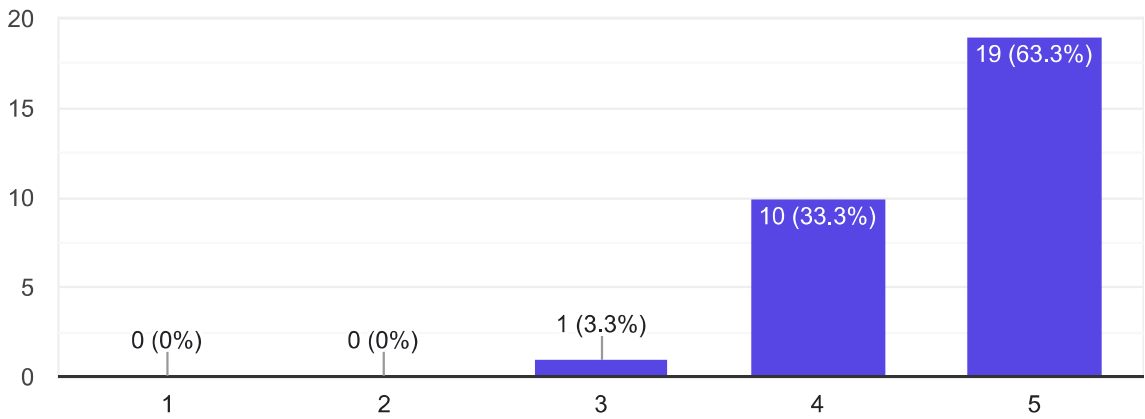

30 responses

I was able to access the system anytime and anywhere without major issues.

 Copy chart

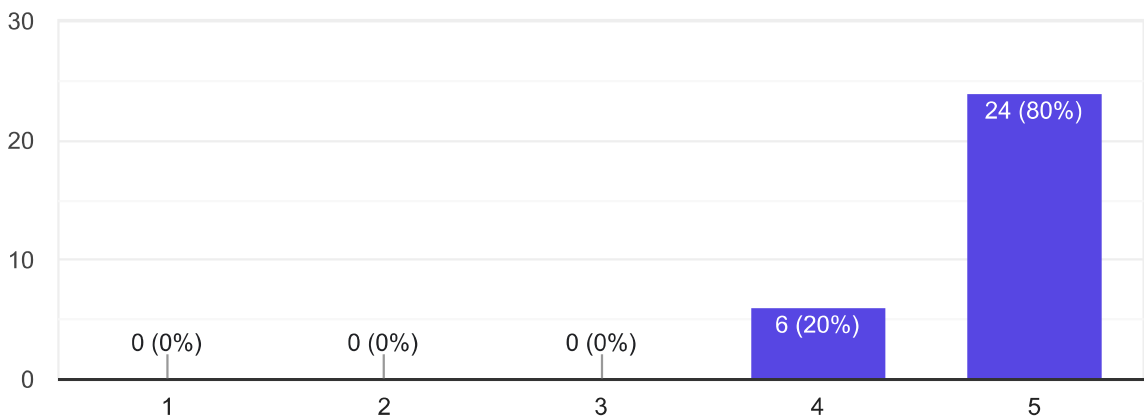

30 responses

The certificate issuance process was clear and easy.

 Copy chart

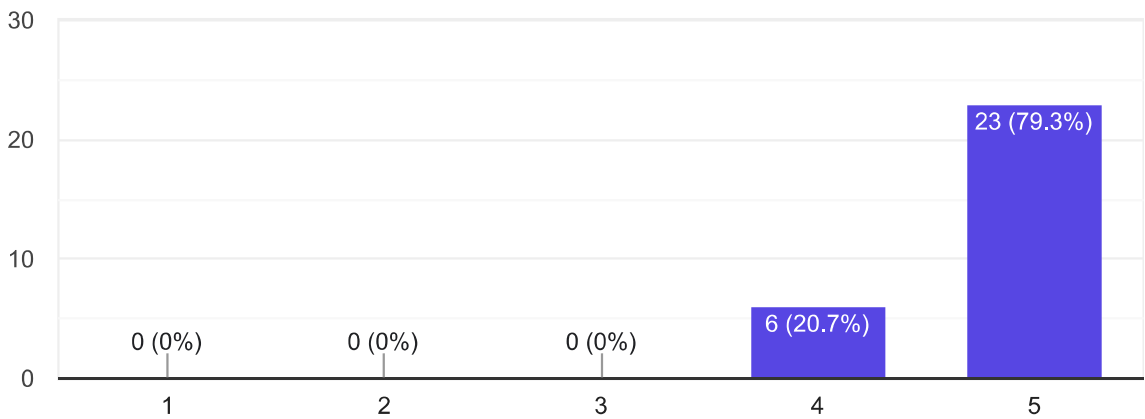

30 responses

The features of the system (viewing records, notifications, medical certificates) are helpful to me as a student.

Section 3: Measuring Operational Goals (Comparative Evaluation)

 Copy chart

Instructions: Please rate the following statements on a scale of 1 to 5 (1 = Strongly Disagree, 5 = Strongly Agree), specifically comparing your experience using the web-based system against the old manual system.

The web-based system makes it significantly easier to provide, update, and securely view my comprehensive medical and dental history compared to the manual process.

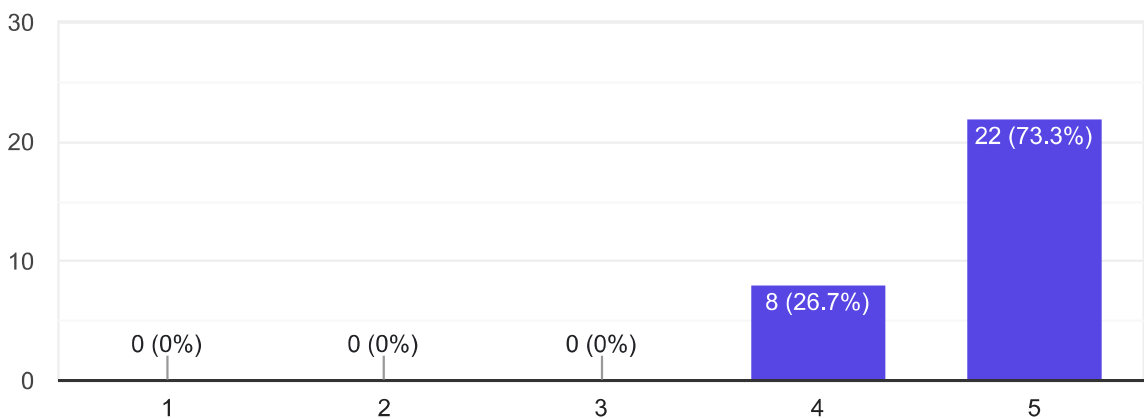

30 responses

The web-based system makes accessing my personal health data (like BMI and vital signs) much more convenient compared to the manual process.

 Copy chart

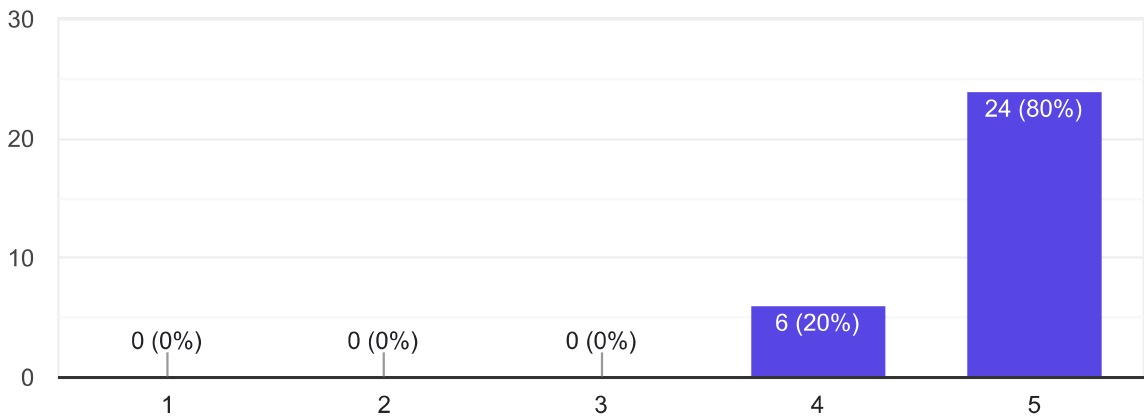

30 responses

The web-based system increases my awareness of the clinic’s health and wellness initiatives compared to the manual process of using physical posters.

 Copy chart

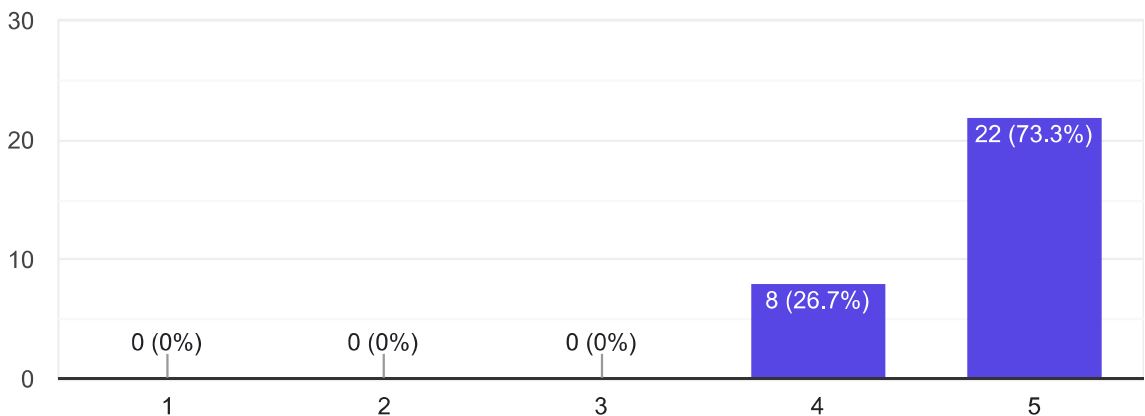

30 responses

The web-based system makes accessing health educational materials and PubMats much easier and more engaging compared to the manual process.

 Copy chart

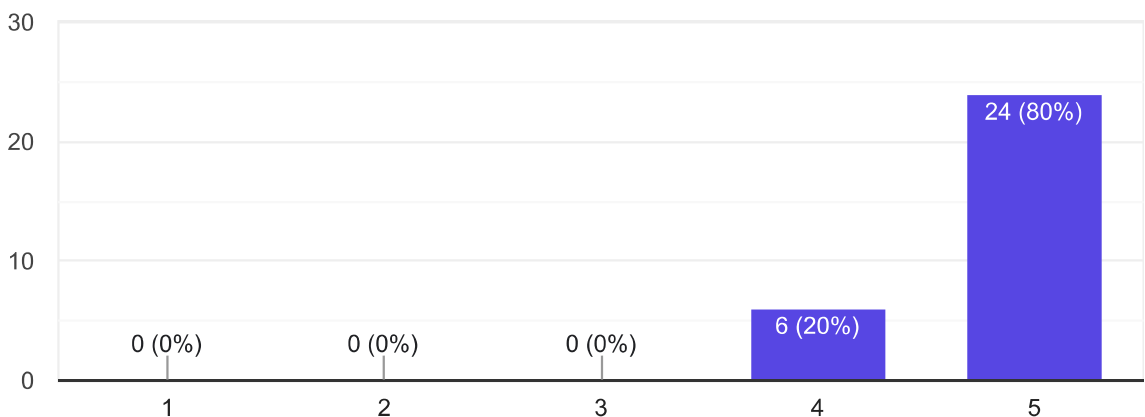

30 responses

The web-based system makes it much more convenient to provide feedback and rate my clinic experience compared to the manual process of using paper evaluation sheets.

 Copy chart

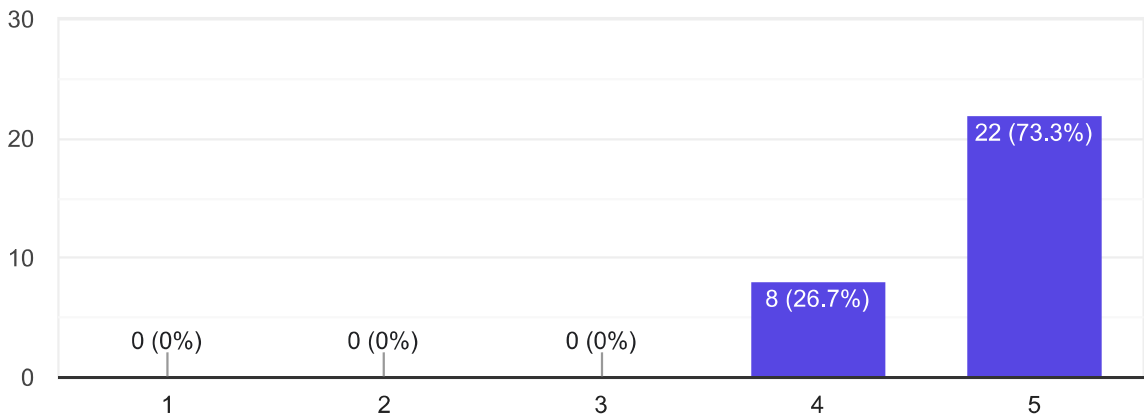

30 responses

The web-based system effectively provides timely alerts and notifications regarding my clinic transactions and health campaigns compared to the manual process.

 Copy chart

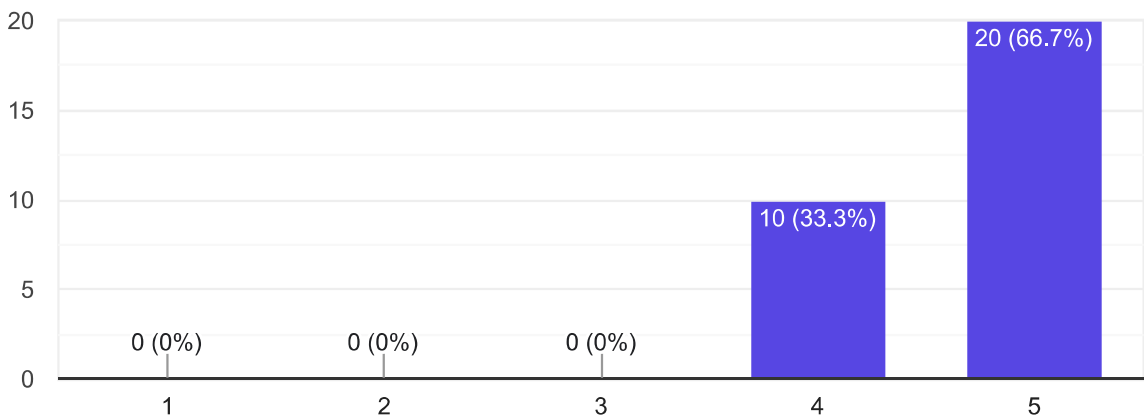

30 responses

The web-based system significantly reduces the overall time required to request and claim a medical certificate compared to the manual process.

 Copy chart

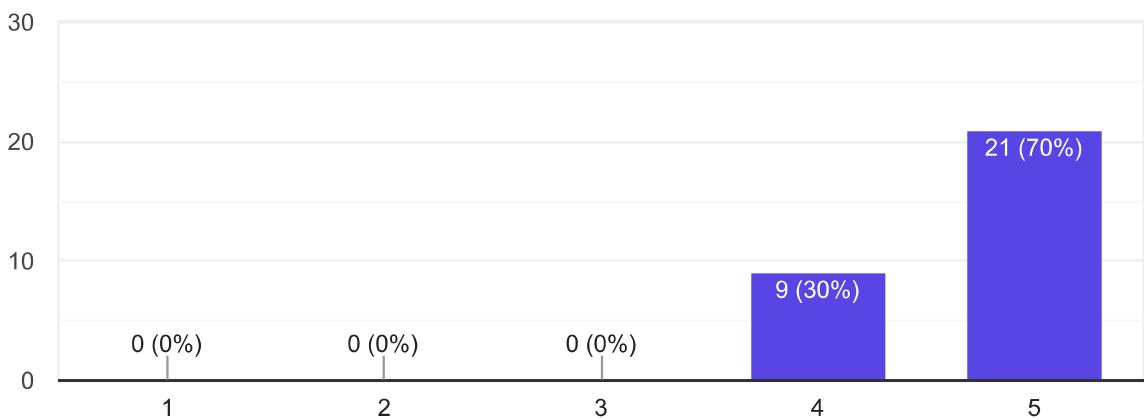

30 responses

The web-based system makes acquiring a medical certificate much less of a hassle compared to queuing up and filling out paper forms in the manual process.

 Copy chart

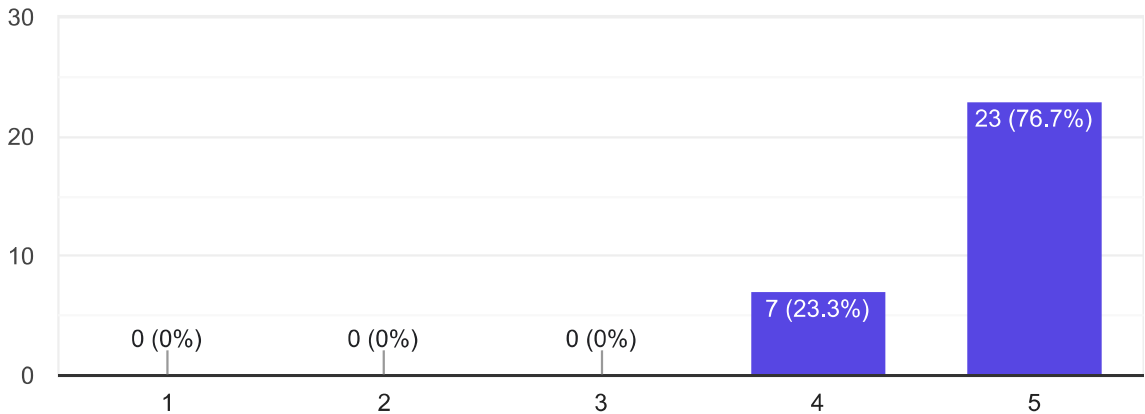

30 responses

Overall, the web-based system is a massive improvement for managing my personal health records and interacting with the clinic compared to the manual process.

 Copy chart

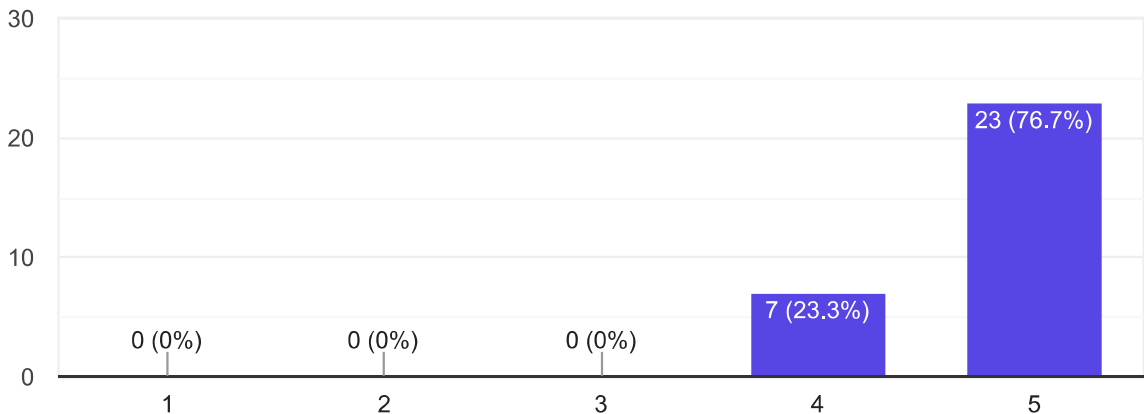

30 responses

Navigating the web-based system is more intuitive and less frustrating compared to the manual process.

Section 4: Qualitative Feedback & Overall Satisfaction

What specific advantages did you experience using this digital system compared to the old manual clinic process?

30 responses

- online access
- easier
- Much faster
- having everything in one
- same
- for keeping the records, its way convenient
- having it accessible online
- Easier and More convenient
- online records
- no friction with online
- nothing specific
- the issuing of an electronic medical certificate for faster and more organize way of keeping records
- easily using phone for the service
- online process
- Convenient compared to paper based process
- how straightforward and easy it is to input data
- convenience
- easier
- I can access my own records at home. very useful when also visiting other clinics or hospitals for reference
- It's easier to look back previous consultations and keep track with medical updates
- much convenient
- speed
- It's easy to access my records. I had multiple visits but I only have my prescriptions as evidence of them. And I may not need prescriptions everytime.
- easier process
- internet

it keeps me updated with the notifications feature

no

i like the new flow of the medical certificate

Is there anything from the manual system that you think the digital system still lacks

30 responses

none

no

n/a

nothing

not really

None

N/A

connecting to other clinics

nothing

more details on records

i dont think so

No

i think the digital system lacks reliability in regarding the information being put down as students are sometimes unaware of their own weight and height and diseases/illnesses

maybe appointment scheduling and maybe a way to chat nurses and doctors for healthcare advice

None so far

nothing i can think

maybe more comprehensive records

cant think of any

Please share any difficulties you experienced when accessing or navigating the system. (Optional)

1 response

nothing

Which feature did you find most useful? (Optional)

3 responses

- the notifications feature it helps me stay updated
- BMI calculation
- the notification feature

Which feature did you find least useful or confusing? (Optional)

1 response

- nothing

What additional features would you like the system to have, or how could we improve the interface for a better student experience? (Optional)

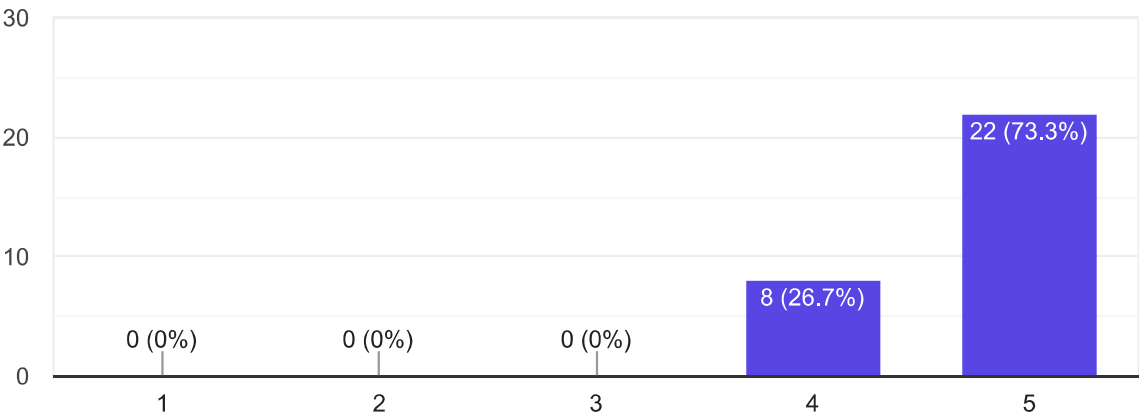

2 responses

- proper app
- i like the system as it is

Overall, I am satisfied with my experience using the system.
