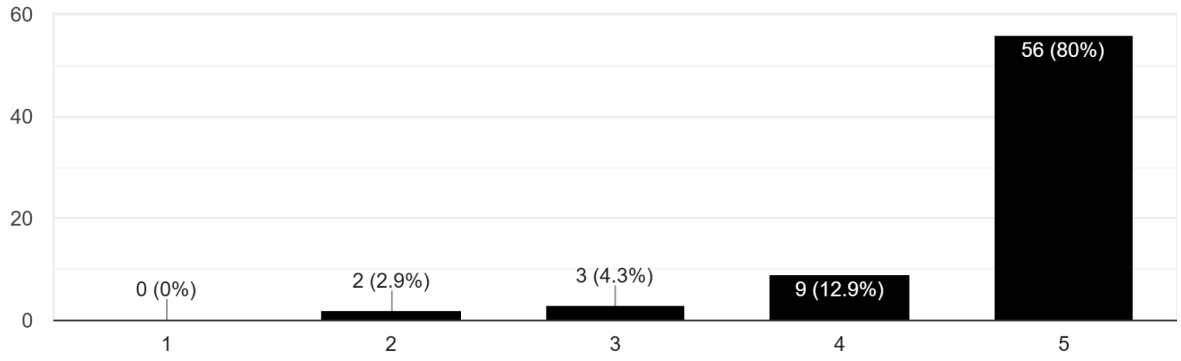
Accessibility & Usability

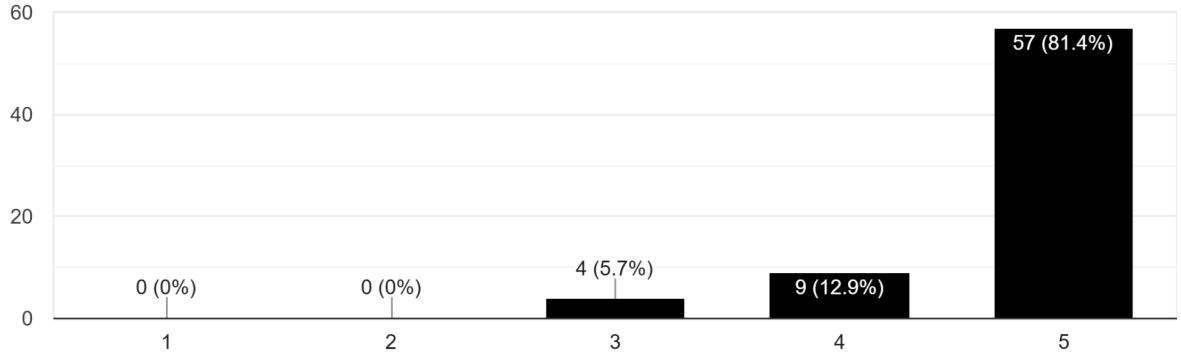
It was easy for me to log in and access my records.

70 responses



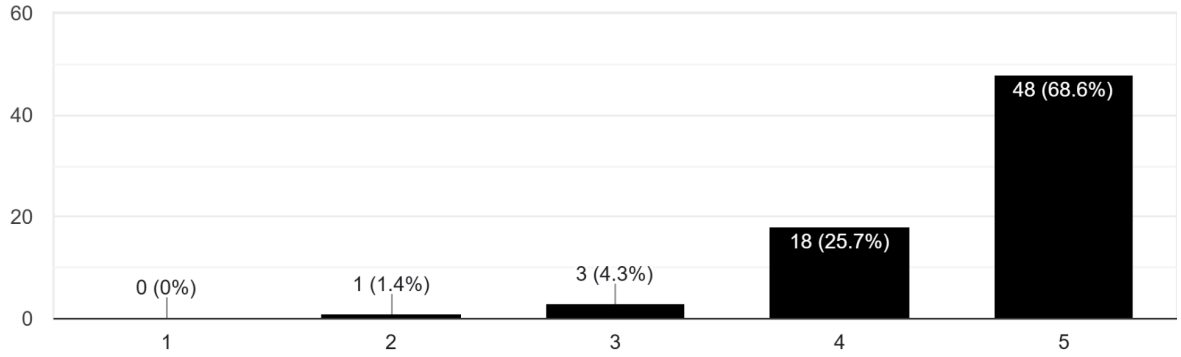
The health information displayed was clear and easy to understand.

70 responses



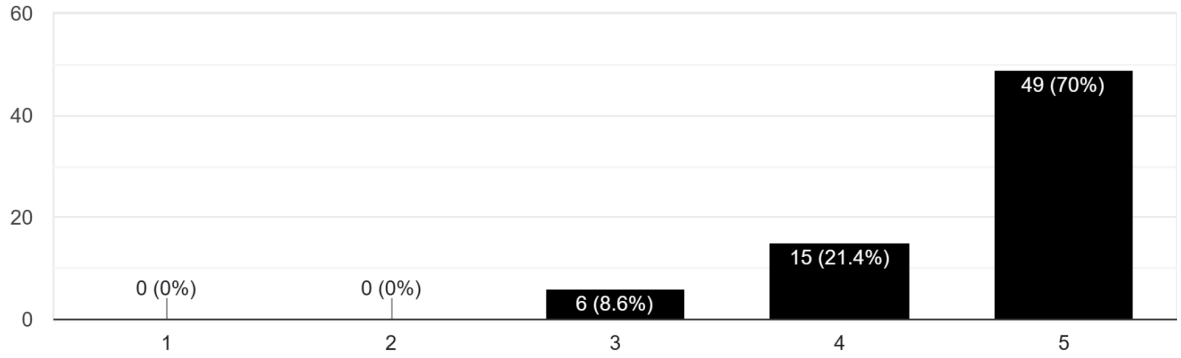
The system was responsive and worked smoothly (loading speed, navigation).

70 responses



I was able to access the system anytime and anywhere without major issues.

70 responses



Please share any difficulties you experienced when accessing or navigating the system.

43 responses

i had difficulties with the program accepting my password

Some pages on mobile browser were hard to navigate

There was no difficulty in accessing or navigating the system. The only problem I had was issues in internet connectivity.

None.

Changes to personal information does not update immediately

Sometimes it takes a few seconds to load different tabs in the navigation bar.

please put dark mode and let students customize the theme

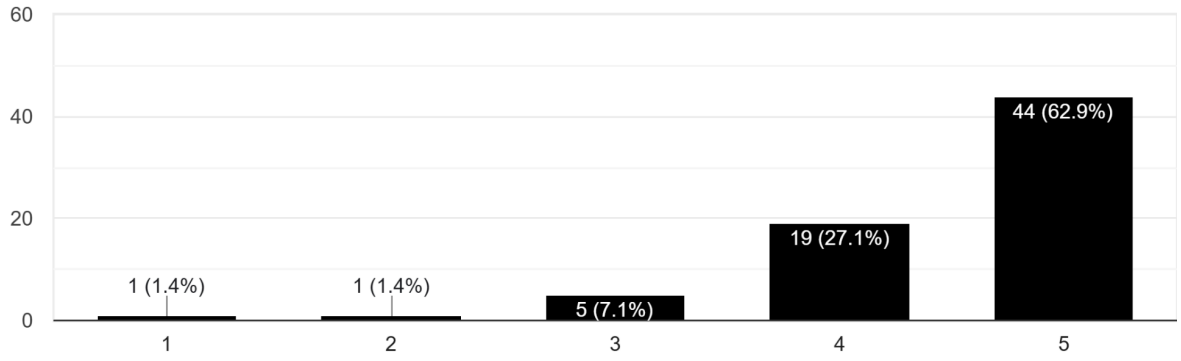
Not that I can see at the moment

None so far.

Features & Satisfaction

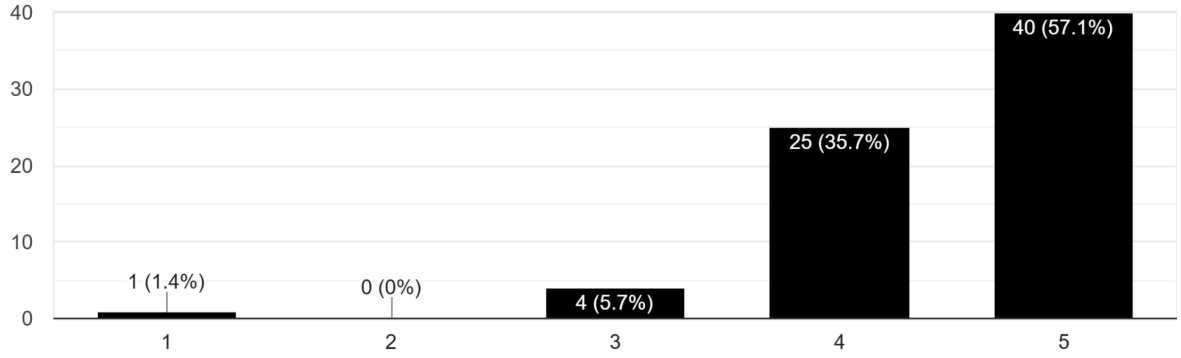
The notifications (updates, reminders) were useful and timely.

70 responses



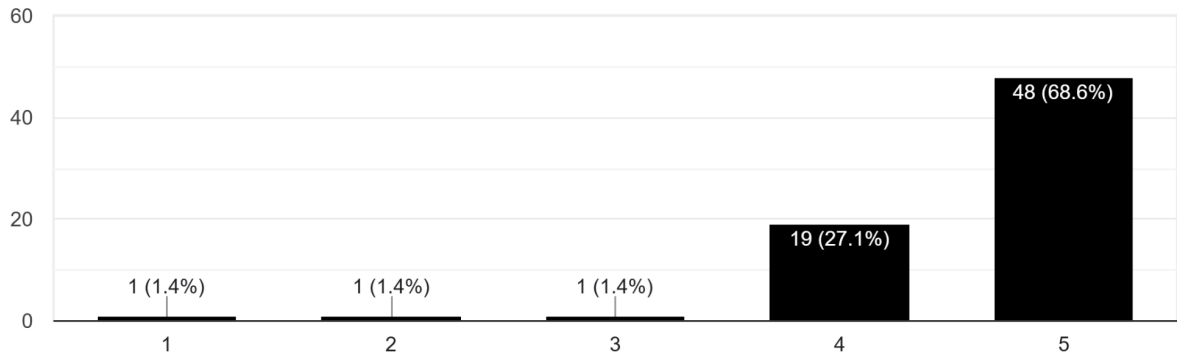
The certificate issuance process was clear and easy.

70 responses



The features of the system (viewing records, notifications, medical certificates) are helpful to me as a student.

70 responses



Which feature did you find most useful?

70 responses

Everything that is inside the Patients' tab.

Notifications

The clean and easy to navigate UI

Med Cert

certificate requests

The Medical certificate system

Everything is well organized

Health insights, and healthy records

The patient medical dashboard and the whole website itself

Which feature did you find least useful or confusing?

70 responses

The medcert flow

I did not find anything confusing from the site, all features are understandable and have a practical function.

None

Nothing really, everything in the IS is useful! Genuinely tho.

Where to schedule clinic appointments

None all was useful.

I haven't found anything confusing or least useful yet, as the breakdown in the deployment of the website was very clear and precise: all the needed and useful features were clearly utilized.

Medical Certificates

Suggestions & Improvements

What additional features would you like the system to have?

70 responses

Schedule of Clinic available in Dc And Tc

I guess the USC logo is missing a bit. Probably a header of the USC logo and the SVD thingies would look nice on the top part of the site.

Record of medication taken

A home button to the main screen

I would like a feature for me to see if the doctors clocked in and is in the clinic. Because its really a hassle to go to the clinic only to find the doctor is away or in some event.

None so far

doctor appointment scheduling

dark mode and please let students customize their theme

How could we improve the interface for better student experience?

70 responses

The health tracker

Make it more similar to the ismis UI

I think its all good na

good so far

You could make a mobile version of the website to make navigation a little easy. I believe this is a desktop interface so it stretches out the screen sometimes.

It's already good

The interface is already smooth enough and I really think this should be implemented as soon as possible (if it still in progress). This is a revolutionary project that should have been
in the school website (ismis) long time ago.

Overall, I am satisfied with my experience using the system.
